

## Notes for My Paper

Don't forget to include examples of topicalization. They look like this:

- (1) Topicalization from sentential subject:  
a John<sub>i</sub> [a kltukl [el l-oltoir er ngii<sub>i</sub> a Mary]]  
          **R**-clear COMP **IR**.3S-love P him  
John, (it's) clear that Mary loves (him).

## How to handle topicalization

I'll just assume a tree structure like (2).

$$(1) \frac{x}{y}$$

## Mood

Mood changes when there is a topic, as well as when there is WH-movement.  
*Irrealis* is the mood when there is a non-subject topic or WH-phrase in Comp.  
*Realis* is the mood when there is a subject topic or WH-phrase.
